

AARON T. MERCER

Software and Data Engineer

Raleigh, NC | (555) 010-7734 | a.mercer@example.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Entry-level software and data professional with hands-on experience building Python ETL pipelines, loading SEC financial data into PostgreSQL, and building analytics dashboards in Tableau and Metabase. Seeking a role in software development, data engineering, or analytics engineering.

PROFESSIONAL EXPERIENCE

NORTHGATE FINANCIAL SYSTEMS, Durham, NC

Software Engineering Intern

2024 – Present

- Developed software that let users enter company names and pull financial data from the U.S. Securities and Exchange Commission (SEC) APIs.
- Built Python ETL processes that extracted financial data from the SEC API, transformed it with Pandas, and loaded it into a PostgreSQL database.
- Gave users the latest quarterly (10-Q) and annual (10-K) financial results, including financial ratios.
- Delivered the project using Agile, with code documentation, business requirements documents, architecture diagrams, and iterative user acceptance testing.

PROJECTS

International Soccer Analytics Data Warehouse, Independent Project

2026

- Ingested decades of historical international tournament data and modeled it into fact and dimension tables.
- Built a Metabase dashboard for analytics and reporting on goals, top scorers, and player, team, and club performance, with predicted winners for the next tournament.
- Built with Python, SQL, Metabase, GitHub, and Excel.

Business Intelligence & Data Analysis, Industry Accelerator Program

2026

- Built Tableau dashboards from raw partner company data covering resource usage, net production by state, supply and demand by region, renewable energy, utility power, and hourly demand.
- Used the dashboards to choose the best location in North America for a new data center, supporting the partner's data center infrastructure planning.

House Price Prediction with Linear Regression

2025

- Built a model that estimates house prices from historical data using features such as number of rooms, crime rate, and distance to employment centers, using Pandas, Scikit-learn, and Matplotlib.

SKILLS

Languages: Python, Java, SQL, C++, C, HTML/CSS

Libraries: Pandas, NumPy, psycpg2, requests, Matplotlib, Scikit-learn

Databases & BI: PostgreSQL, MySQL, Tableau, Metabase

Tools & Practices: Linux, GitHub, Agile, full-stack development, cloud technologies

EDUCATION

Master's Degree, Computer Science, Eastern State University

In progress

Bachelor's Degree, Computer Science, Eastern State University

2025

OTHER EXPERIENCE

Tutor, Test Prep Center, Raleigh, NC

2022

- Co-authored a middle school math practice test book and tutored elementary and middle school students in English, math, history, and science.

Teacher, Neighborhood Learning Center, Raleigh, NC

2021

- Taught English and math, graded work, tracked student progress, and organized and proctored exams.
